CenterEdge Advantage 14.1 Release Information

CenterEdge Advantage 14.1 is now available. Any customer with a valid support contract is eligible to receive the upgrade. Just email us at support@centeredgesoftware.com to schedule your upgrade.

Below, we've included a list of the new features and fixes that are included in version 14.1.

ONLINE HELP

- Online help can now be accessed without any issue by site with special characters such as "&" in their name.

MOVIES

- Movie and event ticketing packages may now contain other items, such as concessions
- Ticket sales can be set to ask for customer information based on ticket type, useful for gathering customer data.

POINT OF SALE

- Tab based timed items (Items which charge an ongoing, per minute fee, such as pool tables) have been added as an inventory type, and can be sold through the Point of Sale.
- Current sales tax is now saved in an open check and included when displaying a Check's Open price

GROUPS

- Discounts may now be applied to Online Event Bookings in addition to standard bookings.
- Credit Card Receipts for Group Events can now be reprinted
- An error regarding automatic gratuities and other service charges being calculated incorrectly has been corrected.
- Group receipts containing both auto-gratuities and manual gratuities will now always print out the correct gratuity total.

REDEMPTION

- Manual tickets that do not add to a customer's winnings records can be added in the Redemption Console

- Customer winnings are now tracked by time of day as well as date.

CASH CONTROL

- Rain checks can now be issued, reactivating previously used tickets. This allows customers to re-use unfulfilled tickets without having to deal with additional ticket tracking.

- Barcodes can now be added as a requirement for discounts to enforce source code entries when processing discounts

- Value added tax (VAT) functionality has been implemented in CenterEdge Advantage.

CUSTOMER MANAGEMENT

- Deduplication of customer address info can be performed using the quick customer add form.

- Customer Options is now controlled by its own security right.

ANDROID MOBILE DEVICES

New Android devices for CenterEdge provide a host of improved features over previous iPod models

- Swappable battery and rugged design keeps handheld devices in the field and functional longer

- 2D scanner capable of reading barcodes directly from phone displays

- Business class devices not subject to yearly design changes

- All components can be purchased directly from CenterEdge, instead of partly from CenterEdge and partly from Apple

GENERAL

- Touchscreen signature capture for waivers for POS Tablets running Windows 8 Pro has been added.

- Brunswick interface minute/ frame selection system has been improved.
