Membership Metrics

Your new go-to tool for tracking membership success.

Gain critical insights into your membership program's performance. Effortlessly track key metrics like active members, renewal rates, and sales so you can make data-driven decisions to boost member retention and increase revenue. Say goodbye to manual data crunching and hello to actionable insights that will take your membership program to new heights.

CenterEdge Razor All-In-One Station

Meet your new guest experience powerhouse.

Revolutionize your guest experience with Razor POS. This sleek and powerful point-of-sale system is designed for high-volume transactions. Its compact design offers a swivel base and touch-sensitive screen, making it easy to navigate through transactions, and allow guests to sign membership agreements effortlessly.

Event Agreements

Streamline your event booking process with digital reservation agreements. Send digital agreements for clients to sign directly within the booking process, saving you time and resources. Ensure guests acknowledge event terms and document any changes seamlessly, ensuring everyone is always on the same page.

Apple Pay

Your guests' ticket to an easier checkout.

Whether in-store or online, guests can quickly and easily complete their purchases using Apple Pay. This streamlined process reduces friction and cart abandonment online, leading to increased conversions and a better overall shopping experience. Guests can then add online purchased tickets to their Apple Wallet for ease of check-in upon arrival.

In Case You Missed a Few Additional 2024 Enhancements

The results are in! Clients have been loving our latest products and feature enhancements. Check out a few of this year's highlights you might not know about!

Unique QR Codes on Receipts

Attach a QR code to receipts to direct guests to surveys, park maps, promotions, or other relevant online content.

Customizable Confirmation Emails

Tailor order and waiver confirmation emails with personalized text to enhance guest satisfaction and provide valuable information.

Itemized Receipts at Advantage Kiosks

Enhance guest experience by providing guests with detailed itemized receipts at self-service kiosks, ensuring transparency and clarity.

Online Modifiers to Include Player Cards

Maximize upselling with the ability to upsell player cards as modifiers to other items during online orders.

New Reporting for Events Management

To accompany the new Reservation Agreements feature, new reports **Events Agreements Status**, **Outstanding Reservation Agreements**, and **Event Attendees** help you identify guests for event planning and marketing purposes.

Opt-Out Option for Click to Pay Gratuity

Choose to disable Click to Pay gratuity for event transactions, accommodating specific business needs or policies.

Enhanced Click to Pay Tracker

View completed online payments using the Click to Pay Payments Tracker, with enhanced filtering and near real-time updates to help you easily track and manage online payments.

Improvements to POS and Redemption Formatting

Customize your frontline experience with the ability to minimize POS and Redemption applications and selectively display supported widgets on-screen for easy viewing.

SFTP Data Pump Support

Transmit datapumps using the SFTP protocol to a configured location, ensuring data security and integrity, with the option to choose comma-separated (.csv) or tab-separated data formats to suit your preferences and requirements.

Clock Synchronization Warnings

Receive warnings when system clocks at servers and stations are out of sync, preventing potential issues and simplifying troubleshooting.
